++ Please help with hosting costs and support the Tap ++

This blog provides a regular comment on matters of concern to readers. It is often described as 'lively' 'enjoyable' and 'interesting'. The Tap is run by software professionals who don't invoice their work, but who have ordinary jobs and like everyone else, need some income from time to time. Hosting for the site also costs money each month. The Tap may be free but hosting it is not and with increased traffic comes increased costs. If you are enjoying the Tap, you might bear this in mind and send us a little thank you occasionally. In this current time of mainstream media narrativie control the Tap is a welcome source of alternative news and views. Thank you.

They taught you that the heart was a glorified meat pump.

Coherent Reality

"They taught you the heart was just a glorified meat pump. That it squeezes and pushes blood like some crude mechanical device. A hydraulic engine made of flesh. That is what they want you to believe. Because if you buy into that primitive lie, you never ask deeper questions.

But it is false. It has always been false. And the real science proves it.

Dr Francisco Torrent-Guasp, a Spanish cardiac researcher, discovered what the textbooks refuse to acknowledge, that the heart is not a pump. He dissected thousands of hearts and found that the heart is a single continuous muscle band, folded into a spiral. He proved the heart works like a vortex generator, creating suction and torque, not pressure.

He called it the Helical Ventricular Myocardial Band and it changes everything.

The real movement of blood comes from pressure differentials, electromagnetic flow, and coherent resonance. The blood spirals naturally. It does not need to be forced through miles of arteries and capillaries. That idea is beyond stupid. The so-called pump is not strong enough to push thick fluid through 60,000 miles of tubing. That is basic physics. That lie was dead on arrival.

Here is the truth. Blood moves before the heart forms in the embryo. It flows via frequency, resonance, and electric charge. The body is a field, not a factory.

Your heart creates a toroidal electromagnetic field that radiates six metres from the body. This field syncs with the Earth, the Sun, and every living being around you. It is a resonator. A tuner. A conductor. It aligns the rhythm of your cells. It feels. It remembers. It emits. And it responds to emotion, thought, light, sound, and breath.

When you feel love, grief, fear, or peace, your heart transmits it. It is the central frequency modulator of your biology. Not a fucking pump.

And the institutions know this. The HeartMath Institute has measured these fields for decades. They know the heart has more neuronal cells than parts of the brain. They know it is a second brain. They know coherence in the heart

transforms the entire nervous system.

So why are they still teaching children a 400-year-old guess from William Harvey that has never been updated?

Because if you knew the truth, you would never accept statins or beta blockers again. You would understand that trauma, emotion, and disconnection break the heart field, not cholesterol. You would stop obeying the medical cartel and start tuning your body like the intelligent frequency field it is.

They do not want coherent humans. They want disrupted, inflamed, fragmented people who rely on drugs to survive. That is the business model. And the fake heart pump lie is central to it.

Your heart is not a pressure valve. It is a vortex. A field tuner. A resonating gateway between physical and energetic worlds.

It is the instrument of your soul.

And it has been hijacked by science that refuses to evolve."

Gordon says:

Well now, that was very interesting, Ian, thanks.

I wish I had been taught this in our biology class as a boy, yet nevertheless, here I am learning the truth in my old age.

I did further research this morning regarding your post and came up with a very interesting YouTube video which perfectly demonstrated the structure and workings of the human heart.

https://www.youtube.com/watch?v=MbOyozg_GTs

Thanks again. G.

You're very welcome Gordon. It was news to me too. I'll check the video out. Thanks.

pete fairhurst 2 says:

Excellent info Ian, thanks

I'm pretty sure that Steve Kettle and I discussed this before at Tap, on an older post. If I recall correctly then, Steve recommended
"Human Heart, Cosmic Heart" by Thomas Cowan. Which I subsequently bought and read. The book covers similar ground to this article

Although I have to admit that I found Cowan's personality, and his bio that emerged from the book, to be very off putting. And I probably paid less attention than I should have as a result of that. I will reread it now

This info also chimes for any practitioner of yoga too. It synchs very well with my yoga teacher's teaching, practice, info and approach

It seems obvious in retrospect that, if the heart was just a pump then, it would need to be far more forceful than it is to get the viscous blood through all those capillaries. Simple physics. On that basis alone there must be other mechanisms in play

Finally, heart as a pump is pretty standard, ubiquitous even, as the article says. Is there anything that the mainstream tells us that is actually true? Every time that you dig deeper then you find lies and deceptions

Kneepad says:

I've come to the comments to say the same thing Pete, Tom Cowan was saying all this a few years ago. He has been ridiculed so much by the mainstream over his virus views its hard for normal people to take him seriously and begin to understand where the medical world all went wrong. He claimed it's impossible for a 1 1/2lb lump of meat to pump blood around 150,000 miles of blood vessels that our in the body and claimed it's a vortex. The heart is apparently a seven sided vortex that can be unfolded, I forget the name the shape is given sorry. Everything medical, especially all the mis-information, seems to gravitate

back to the 1920's and JD Rockefeller, the Flexner report and I think his partner in crime was Andrew Carnegie. One not so small point, that I did not see above, but Cowan made a point of, was that stents can't work if the heart is not a pump and I've also read and it is touched on above, we make decisions with our heart and not the brain. Your brain is the processor of information and not the place of origin for thoughts and feelings, he explained the brain as a bit like a processor in a computer, it processes the information inputted into it. As mentioned above, the more you dig the more bizarre and extreme the lies become. Imagine what we would be capable of if we could sort all this out and get everything working as it should.

While on the subject of the medical industry, I've recently come across this and it actually does work on google translate, I'm hoping there is someone with knowledge of Latin who could maybe confirm if it is true or not. Astrazeneca when passed through the google translate page, Latin to English, it comes out as 'A road to death' when inputted like this; A stra ze neca' Can anyone verify this please, I did ask Marianna but she refused to verify it for me.
